

DAILY HERALD.

FIRST STREET.

The Property Owners Propose to

Make it Eighty Feet.

The property owners along First street met last night at the City Council Chamber. Mayor Workman called the meeting to order, and stated that he had called the meeting for the purpose of considering the widening of First street, from the river to Main street. He considered the matter to be of the greatest importance, since the street is much too narrow to permit of the traffic which will hereafter go over it.

Dr. J. P. Widney was called to the chair, and said that the only thoroughfare to the new depot were First and Second streets, and they were much too narrow. He favored the widening of the street by 20 feet, and thought the sooner it was done the better for the people.

Judge Stephens moved that a committee of five be appointed to act in conjunction with the City Engineer in the matter, and to confer with the Mayor.

Mr. Book moved that it be the sense of the meeting that First street be widened from Boyle avenue to Main street. Carried unanimously.

Dr. Widney thought that the committee proposed to be formed by Judge Stephens should also fix the cost, the rate and estimate of damages.

Mr. Valla said he was in favor of widening the street and of paying any reasonable assessment.

Mr. Trantum said he thought it was well to avoid taking the matter into the courts. There was no necessity, he thought, of widening at present between Los Angeles and Main streets, unless the people above Main were willing to contribute. He suggested the propriety of donating ten feet on each side, and that he thought could be done immediately below Los Angeles, but if the people above Main did not care to pay the cost he hoped that the property owners would not hold back for that.

Mr. Ling, on behalf of the Northside estate, objected to the widening of First street between Main and Los Angeles, because he thought the street was to be widened for the benefit of the street car company.

Judge Stephens' motion was then carried, and the following committee was appointed: O. Trantum, R. Miller, J. M. Davis, J. H. Book and Antonio Valle.

The following paper was offered for consideration: "We, the undersigned, property owners along First street, would respectfully ask that steps be taken to decide upon the best method and the cost of widening said street to eighty feet for the following distances, giving a separate statement for each, viz:

First, from the river to Alameda street.
Second, from the river to Wilmington street.
Third, from the river to Los Angeles street.
Fourth, from the river to Main street.
Fifth, from the river to Boyle avenue.

This paper was signed by a large number of property owners and will be presented to the Council in the state of a petition. The meeting then adjourned to the call of the Chairman of the committee.

The Kahala Street Bridge.

EDITOR HERALD.—After having been present during the various sessions intended for the investigation concerning the Kahala street bridge, caused by one of our worthy Councilmen preferring charges based upon the alleged misrepresentation, or whatever it may be called, of our City Surveyor, in awarding the contract to the San Francisco Bridge Company.

The fact being once established that said agreement was conclusive and binding to both parties, whether the first part is the city of Los Angeles or any individual, does not matter, and under no circumstances whatever (even presuming that our worthy city fathers had committed a mistake of a disastrous nature, detrimental to all taxpayers) it would not make any difference after, as before mentioned, the fact of the validity of the contract in question had been established.

The writer has come to the conclusion that the sooner the accusation preferred against the City Surveyor, whose integrity is thus attacked, is declared to be false and groundless the better it will be for all concerned and the public in general, inasmuch as the charges preferred against him have been sufficiently disproved by the developments of several sessions, above referred to, without the aid of a sanguine lawyer, and which is best explained by the Mayor's question put to Councilman Stewart, "Why did you call our attention to the possibility of getting the amount reduced before the contract in question was awarded?" which was rewarded by one of his numerous evasive answers, respecting its absolute vanity in every respect.

Evidence of Knox, Ledbetter and other renowned civil engineers called by the accuser to substantiate the charge and to disprove the veracity and ability of our well-known City Surveyor, Mr. E. Eaton, failed to prove anything but the absurdity of the charges, and as a matter of justice and for the benefit of city taxpayers, the contract should be upheld in order to preclude the possibility of being obliged to pay more, owing to the high railroad rates at present and the expense a lawsuit might cost.

In conclusion I may add that in order to do justice to all taxpayers, the evidence obtained should be laid before the public to see whether the accusation was a justifiable one or one derived from other sources than having in view the welfare of the city taxpayers.

O. W. KRAUSE.

Board of Public Works.

The Board of Public Works met yesterday morning and transacted considerable business. A complaint was received from George Hanley in relation to the obstruction of a culvert on San Fernando street by the railroad company.

Complainant in regard to the official bed of the Los Angeles river was referred to the City Surveyor.

The Board recommended that a deed be accepted from H. G. Wilshire for forty feet of his land on the west side of West Lake Park, to make an eighty-foot street to be called "Fairview" avenue.

That the petition to establish the grade of North Pearl street, from Temple street to Bellevue avenue, be referred to City Surveyor to secure right of way from owners before grade is established.

That the City Surveyor be ordered to stake out a line for a levee for Charles Street and others, on Los Angeles river, east of covered bridge.

Recommended that the petition of Kase Electric Railway Company, for a franchise, be rejected, but that the company be requested to demonstrate the

feasibility of their road, outside the city.

Recommended that a franchise be granted Ralph Rogers and others to build a cable or horse car line from the corner of Hoff and Chestnut streets to the northern boundary of the city, to be completed within a year.

Cure for Piles.

PILES are frequently preceded by a sense of weight in the rectum, and lower part of the abdomen, causing the patient to suppose he has some affection of the kidneys or neighboring organs. At times, symptoms of indigestion are present, flatulence, uneasiness of the stomach, etc. A moisture like serum, protruding, a very disagreeable itching, after getting warm, is a common attendant. Blind, bleeding and itching piles yield at once to the application of Dr. Bosanko's Pile Remedy, which acts directly upon the parts affected, absorbing the tumor, relieving the itching, and effecting a permanent cure. Price 50 cents. Address the Bosanko Medicine Co., Signs, O. Sold by F. H. Heinemann.

Cases Given Away.

The streets and avenues in the town sites are fast approaching completion, the water is under pressure, the side tracks are in and all regular trains stop at this station. Unnecessary Misery.

Probably as much misery comes from habitual constipation as from any derangement of the functions of the body, and it is difficult to cure, for the reason that no one likes to take the medicines usually prescribed. Hamburg Pils were prepared to obviate this difficulty, and they will be found pleasant to the taste of women and children; 25 cents; at all druggists. J. J. Mack & Co., proprietors, San Francisco.

BURBANK.

Another New Suburb of
the Metropolis.

BEAUTIFUL BURBANK CITY.

A Beautiful Site for Homes in a
Land of Riches and Perpet-
ual Flowers.

The Providencia Rancho, extending
across the valley of the Los Angeles
river ten miles north of the city of Los
Angeles, from the Providencia moun-
tains through the Los Angeles valley to
the San Francisco Maria mountain, con-
taining 17,000 acres, is a rare spot of
earth, especially favored in every way
by nature. The south end is occupied
with beautiful hills, embellished with
shrubby and valleys of evergreen oaks.
In this locality are perennial springs
and lakelets and orchards of evergreen
oak. In the plain along the sources of
the Los Angeles river are thousands of
acres of the very finest of alluvial soil
on which large and luscious fields of grain
are growing most luxuriantly. The
Southern Pacific Company has its
great transcontinental line at the north-
ern side of this rich plain and stops
trains for the night on the plain.

From the lowland plain the tract
commences to rise towards the moun-
tains on the northeast at the rate of 150
to 300 feet per mile. On this magnifi-
cent slope the townsite of Burbank is
located, a side track laid and a
depot established to the north of the
depot, named after the former proprietor
of the rancho. This beautiful plain ex-
tending from the railway to the moun-
tains is a glorious piece of land that is a
prize factor in the wealth of the State.

The soil is matchless, the situation ad-
mirable for health and beautiful scenery.
On the west the great San Fernando val-
ley displays its hundred thousand acres
of grain; on the north the great San
Francisco Maria mountain is a barrier
against the winds of winter; on the south-
west the low mountains of Providence
and Caliente, clothed in emerald robes
are a perpetual delight while on the
east and south the great valley of
the Los Angeles river, with its fields
and homes of beauty, embracing Glendale,
the riverdale villas and the city of
Los Angeles, complete the frame in which
nature has made for this beautiful town.
The soil is a sandy loam, full of vegeta-
ble mold, easily tilled and free from all
adobe or baking soils of any kind. It
is the perfection of choice fruit land for
both deciduous and semi-tropical fruits.
On the north side of the railway ex-
tending from the track to the mountain
is a tract of 500 acres laid out into lots
for the business part of the city of
Burbank. A broad, straight avenue 100
feet wide extends from the depot to the
mountains, named five-acre avenue, flanked
on each side with Orange Grove and
Angelo Avenue, 80 feet in width, the
other avenues parallel are Cypress,
Magnolia, Palm, Verdugo, Tujunga and
Providencia avenues, 60 feet in width.

The cross streets are numbered after
Front street, which is the railroad street
150 feet in width, as First, Second,
Third, Fourth and so on up to the moun-
tain. The lots on the five central ave-
nues are 50x155 feet, with alleys in rear.
On the outer avenues the lots are 35x116
feet, just the right size for a home
and a garden of fruit.

On the upper side of the tract a tunnel
has been thrust into the side of the
mountain, about a mile and a half from
the depot and 400 feet above it, from
which comes a fine stream of pure
mountain water that is carried in
iron pipes to every lot in
the settlement. A large cemented
reservoir is being made at the base of
the mountain that will hold 2,000,000
gallons of water, so the supply for the
town will be ample. All the streets and
avenues are being graded, and that por-
tion of the mountain that is covered with
brush is being cleared by the company.

A fine hotel to cost \$50,000 is being
constructed by Dr. Burbank, and nine
other houses that are to cost in the
aggregate \$50,000, are under contract to
be completed by the 15th of May and
completed by August text. The names
of the following gentlemen who are the
proprietors of the property are a suffi-
cient guaranty of their ability to carry
out their contracts: L. T. Garney,
President; David Burbank, J. Downey,
Harvey H. L. Macneil, T. W. T. Rich-
ards, E. E. Hall, George W. K. ng, W.
H. Gouber, J. A. Fillmore and Senator
McFadden.

Their large capital and great energy
are sure to make the settlement a success.
These gentlemen purchased the great
rancho, a large part of which is covered
with grain, for \$258,000, which they
have paid. They have, within the past
month, sold over \$300,000 worth of the
land, and are selling daily at a rapid
rate. They can accommodate all classes
of buyers—those who want a business
lot at the depot, those who want a busi-
ness lot at the depot, those who want a
residence lot, those who prefer an acre or
a five or ten or 100-acre tract, either on
the high mesas or in the moist land
around the laguna. They will open an
office at Burbank station this week,
with telephone connection with the main
office in this city, in Bryson Block,
Spring street.

All the prospects of Burbank seem
auspicious, and indicate that it will soon
be a great and prosperous settlement,
filled with a happy and cultured popu-
lation.

Tragedy Next Week.
The rendition of *Virginia*, which will form the opening bill of Frederick Ward's engagement at the Grand Opera House next week, is thus spoken of by the New York World: "The Third Avenue Theater was crowded last evening to welcome Frederick Ward, the well-known tragedian, who opened his week's engagement with Sheridan Knowles' thrilling tragedy, *Virginia*. Mr. Ward has evidently given much attention to the study of this character. Every detail was carefully acted, and in the heavier parts the tragedian was especially effective. His portrayal of the feelings of the ideal Roman citizen, whose devotion to his country is strong, but whose love for his honor and name is stronger, was vigorously applauded. Indeed, at the conclusion of the fourth act, where Lucius informs him of his daughter's unfortunate captivity in the hands of Caius Claudius, he carried his audience with him, and was twice compelled to bow his acknowledgments to their cheers."
